Android Menus

3 types of Menu

- Option Menu - Regular Menu – three dots in the top right
- Context Menu - appears when user press long click on the element
- Popup Menu – menu items based on the space available on screen

Option Menu

- **Android Option Menus** are the primary menus of android. They can be used for settings, search, delete item etc.

- Inflate the menu by calling the **inflate()** method of **MenuInflater** class.

- To perform event handling on menu items, you need to override **onOptionsItemSelected()** method of Activity class.
